

Agency Drive - Notes & Comments - EN114 - MY 2003

MPG 10/10/01

Crown Victoria, Grand Marquis, Marauder

MY 2003 Improvement	Customer Benefit
4 Valve per cylinder All Aluminum 4.6L Engine	Modern, refined and efficient powerplant with smoothness typical of the finest automobiles.
Marauder 300 Horsepower	This power level rapidly accelerates the car throughout the speed range.
Marauder 310 ft. lbs of torque	Large amount of torque/force applied to the rear wheels provides for very quick acceleration and performance feel.
Marauder std with Police Car transmission housing	The Marauder tailshaft housing is a special unit from Police Car packages for sustained durability at high speeds.
Marauder std with special transmission gear coatings	The gear set for Marauder is internally known as the "plus" gear set due to special gear treatments for longer life.
Marauder std with limited slip rear axle	The Marauder is delivered with a torque biasing unit that allows for maximum traction and acceleration under low friction conditions.
Marauder std with special one way clutched alt. pulley	Marauder comes with a special alternator that prevents belt squeal at high rpms during rapid transmission gear changes.
Marauder std with special air cleaner housing	The Marauder is built with a larger air cleaner inlet for improved high rpm breathing capability.
Marauder std with special mass airflow sensor	The mass air flow sensor is attached to the air cleaner. Marauder's MAFS is specially trimmed for maximum air flow.
Marauder std with Police Car aluminum driveshaft	Every Marauder has a 3-1/2" diameter aluminum driveshaft allowing for higher vehicle speed. Vehicle weight is reduced and the strength is increased.
Marauder has new 4 valve cylinder heads	Marauder cylinder heads have new ports for improved breathing throughout the rpm range.
Marauder std./w brazed torque convertor	The automatic transmission torque convertor is brazed for higher strength to contain the high engine output.
